After pursuing and performing piano for over a decade, I decided it was time for a change. Since August of 2022 I have dedicated the 8 hours a day I would have spent practicing the piano to learning various coding languages and creating projects to prepare for a new career path. What I lack in written experience, I make up for with self motivation to learn, grow, and achieve. I see solving problems and learning new methods as exciting and motivating. I am loyal, eager to grow, and willing to put in the time and effort to be an asset to your company.
